The Johnstone and Johnstone Brand

Great brands build strong bonds with their audience by being consistent. They are instantly recognizable and immediately stand for something. They speak a common language, despite the fact that they may be speaking to very different people from very different places.

From business cards to listing presentations to websites, adhering to these guidelines ensures that the look and feel of Johnstone and Johnstone remains consistent across all mediums. While we always encourage creativity and out-of-the-box thinking, we want to stay true to our roots when representing our brand.

Primary Logo

The Johnstone and Johnstone rectangle is the primary graphic element that identifies our brand.

This trademark makes Johnstone and Johnstone’s storefronts, products, websites, and other visual communications easily identifiable, enhancing our brand presence and professionalism. Since our logo plays a key role in making our brand recognizable and memorable, it is required to appear on all marketing and communication pieces.

Clear Space

To ensure legibility, allow enough space around the logo to keep it clear and uncluttered. This space isolates the mark from any other competing graphic elements that may conflict with, overcrowd, and ultimately lessen the impact of the mark.

Minimum Size

The smallest the logo should be represented is .5” high.

Exceptions

There are some instances, such as novelty items, where these dimensions will be too large. In such cases, please use your own discretion to determine proper size and clear space.

Secondary Logo

Though it doesn't happen often, there are certain instances where the use of a secondary logo may be necessary.

Black and White

Use this version if you're printing in black and white or if this logo would fit on your design piece better than the standard black and red logo.

Square Logo

Use this version if you have a narrow space to work with or if this logo would fit on your design piece better than the standard black and red logo. The smallest the square logo should be represented is .75" high.

Logo Don'ts

A few rules are necessary for maintaining the integrity of the brand.

- A Don't rotate the logo.
- B Don't stretch or skew the logo.
- C Don't enclose the logo.
- D Don't add a drop shadow to the logo.
- E Don't use the Family of Companies logo unless you are an executive or employee of REO Corporate creating internal marketing pieces.
- F Don't alter the color of the logo.
- G Don't crowd the logo. Always leave white space around the logo.
- H The size of the name of the Firm must be greater than or equal to the size of the name of the Licensee. For details watch Letter of the Law I Real Estate Advertising: mirealtors.com/legal-resources
- I Agent logos should not be included on any signage.

Typography & Tone

We have a lot of important things to say. When we all say them in the same way, our story has more impact and our audience can better connect with our brand.

Johnstone and Johnstone demonstrates that it's entirely possible to be professional and approachable at the same time. We are reliable without being boring. Confident yet humble. We are optimistic and always looking for the next game-changing solution. Our tone is conversational, polished, and in alignment with both our standards and identity. We take great pride in our core values and strive to exhibit those characteristics in everything we say and do.

Typography Overview

Used correctly, typography can evoke emotion or fit a certain style. Careful selection and consistent use of a typeface can be just as important as color and imagery when creating and solidifying a professional brand.

Johnstone and Johnstone uses two main typefaces, Avenir and Baskerville. Avenir is stylish, light and airy, while Baskerville is elegant and refined. Combined, the two fonts convey the professional, yet laid-back culture of our company. In addition to having many style variations, these two fonts are interchangeable for header and body copy, depending on the mood of the project.

Photography is one of the most vital elements of Johnstone and Johnstone's brand identity. High-quality visuals are paramount in both digital and traditional marketing.

A good photograph is clear, crisp, and purposeful. Images should provide consumers with useful information about a property such as features, amenities, room scale, and surrounding landscape.

Due to the automation of digital products, we recommend photos be taken in landscape/horizontal format. Additionally, every photo should tell the home's unique story, not only through the image depicted, but also in the order the photos are viewed. The first photo should always be the most intriguing.

Social Media

As an active member of the business community, Real Estate One Family of Companies realizes the value and importance of social media for business promotion and practices.

We recommend agents using a company-branded Business Page, for most of you that is Facebook. Use this site to showcase your listings, promote an open house or just connect with clients. This site should not be used for personal, non-real estate-related posts or business posts that can be perceived as negative against other agents or companies.

If you use your social media profiles for personal use, please keep it as such. You're encouraged to state that you are a proud member of our Family when completing the About section, but we do not recommend the use of company logos in your Profile Picture or Cover Photo. Showcasing your success is a powerful tool but be aware that when you present your professional business on your personal page, you must be conscientious of what you post, share, like and comment.

Rule of thumb: keep your personal social media sites, personal and your business sites, business.
